Education

Istanbul Aydın University

Sept 2022 - Jun 2026

Bachelor's Degree, Management Information Systems

Courses: Algorithms And Programming // Object-Oriented Programming // Management And Organization // Database Management Systems // System Analysis And Design // Web Programming // AI and Machine Learning

Professional Experience

NeveraTech – Frontend Developer

Istanbul - On-site | Feb 2026 – Mar 2026

- Developed a modern hotel website using React and TypeScript, integrating RESTful API to render real-time availability and dynamic content.
- Collaborated with the development team using Git-based workflows for version control and efficient code management.
- Built responsive UI components and improved user experience.

Rast Mobile – Software Developer Intern

Istanbul - On-site | Oct 2025 – Jan 2026

- Built cross-platform mobile applications using React Native for iOS and Android.
- Designed and implemented responsive mobile UI components, establishing design consistency across screen sizes.
- Implemented navigation flows and state management.

Flo Group – Intern

Istanbul - Remote | Aug 2025 – Sept 2025

- Participated in an online internship program focused on Artificial Intelligence, Digital Marketing, and Business Technologies.

Smartiks Technology Solutions – Long-Term IT Intern

Istanbul - On-site | Oct 2024 – Jun 2025

- Developed responsive web applications using React and TypeScript.
- Developed practice applications with React Native, gaining experience in cross-platform mobile development.

Skills

Programming Languages: JavaScript, TypeScript, Java, Python, SQL

Frontend: React.js, React Native, Next.js, Redux, React Router, HTML5, CSS (Tailwind, Bootstrap), Jest

Backend & Databases: Spring Boot, Spring Security, Spring Data JPA, Hibernate, RESTful API, JWT, PostgreSQL, Swagger/OpenAPI, Git

Full-Stack Automotive Dealership Management System:

- Architected and developed a full-stack Automotive Dealership Management System featuring a scalable **Java** and **Spring Boot** backend (Controller, Service, and Repository layers) and a responsive **React/TypeScript** frontend.
- Implemented CRUD operations for core entities including vehicles, dealerships, customers, sales, accounts, and addresses through **RESTful APIs**.
- Modeled and persisted relational database entities and complex relationships using **Spring Data JPA**, **Hibernate**, and **PostgreSQL**.
- Implemented secure **JWT**-based authentication with access/refresh token flow using **Spring Security**.
- Integrated Central Bank (CBRT) live currency exchange rate service to support multi-currency vehicle pricing and documented all APIs with **Swagger/OpenAPI**.

PawsFocus – Pomodoro App:

- Developed a cross-platform Pomodoro productivity mobile application using **React Native and TypeScript** for iOS and Android.
- Built customizable focus and break timers with animated and video-supported sessions, using local state management to persist user preferences across sessions.

Task Management App:

- Built a Kanban-style task management application using **React Native**, supporting full CRUD operations across tasks and boards.
- Implemented a fluid drag-and-drop interface and persisted application state locally using **AsyncStorage**.

On-Duty Pharmacy Finder App:

- Launched a pharmacy finder covering 81 cities across Turkey, pulling live on-duty data from a public REST API.
- Implemented city and district-based filtering to enable users to quickly find and access on-duty pharmacies.

AI Stock Price Prediction – BIST 30 Forecasting App:

- Built a machine learning system to forecast next-day closing prices for BIST 30 equities, benchmarking 5 ML models (**Linear Regression**, **Bayesian Regression**, **Decision Tree**, **Gradient Boosting**, and **Neural Network models**) to identify the top performer.
- Extracted and preprocessed historical market data (2018–present) from Yahoo Finance using **yfinance**, **Pandas**, and **NumPy**.
- Developed an interactive **Streamlit** dashboard using **Matplotlib** to visualize predicted vs. actual price curves and model evaluation metrics.
